The NBER project on the Economics of Digitization will hold a meeting from noon March 1, 2017 through the end of day on March 3, 2017. On March 1 and 2, the meeting will involve a tutorial for economics graduate students.

The tutorial will introduce graduate students to overviews of this young frontier area of research and provide graduate students face-to-face time with research leaders. The final day of the meeting will involve presentations of frontier research by six researchers and discussants, as part of the winter meeting of the NBER digitization group. The meeting will be held at the facilities of the Stanford Institute of Economic Policy Research at Stanford University.

The National Science Foundation has generously funded two nights of hotel and living expenses for twenty graduate students at the meeting.

Students with special travel issues may ask to have a third night covered. Students must cover their own travel expenses.

To apply students should send an application with the following:

- Please provide contact information, including email.

- Please provide a short description of the course of study pursued during graduate work, including the type of course work pursued, major and minor focus of study, year of advance, and so on.

- Please provide a short description of general research interests or other projects pursued. If the student has proposed a dissertation, and formed a committee, please provide a short description, expected date of completion, and general details.

Both new and returning students are encouraged to apply.

The application should not exceed two pages. Please send applications electronically to: Denis Healy, dhealy@nber.org.

The deadline for submission is midnight, EST on Friday November 18, 2016. Notifications will be made by Friday December 9, 2016.
