Required textbooks for the fall 2015 M.S. and Ph.D. core classes:

These books can be ordered through the University Bookstore’s website. Under “Books,” click on “View Books by Course” or “Order/Reserve Your Books.” Books in the following list that are considered “optional” are so noted.

Math camp:

Math camp is an informal, no-credit, no-fee math review course covering some basic concepts from calculus, linear algebra, and real analysis that will be essential tools in both the Ph.D. and M.S. level core courses. It will meet prior to the start of fall semester during the weeks of August 3 and 10. Although math camp attendance is optional, all new students are strongly encouraged to attend. For more information about math camp, click here.

The principal reference for math camp is the same as one of the required text books for Econ 600: Simon and Blume, Mathematics for Economists. (See below.)

M.S. core classes:

Econ 500 Quantitative Methods in Economic Analysis I

ISBN: 9780273713241

ISBN: 9781461450221

Econ 501 Microeconomics

Econ 502 Macroeconomics

No textbook requirement. Required readings will be from a packet of lecture materials prepared by the instructor and available for purchase locally, and from various online resources.
Ph.D. core classes:

Econ 600 Quantitative Methods in Economic Analysis II

Econ 601 Microeconomic Analysis I

Econ 671 Econometrics I

Optional:
