

Relationship between ~~Real~~ Real, Nominal GDP and GDP deflator:

$$\text{GDP deflator for 2010} = \frac{\text{Nominal GDP for 2010}}{\text{Real GDP for 2010}} \times 100$$

Growth rate for any variable x between time t and $t-1$,

$$= \frac{x_t - x_{t-1}}{x_{t-1}} \times 100$$

$$\text{Real interest rate} = \text{nominal interest rate} - \text{inflation rate}$$

→ You can use this to answer Q4. It is possible to answer Q4 in other ways also.
