

Practice problem set # 9

Econ 500, Fall 2009

Instructor: Sunanda Roy

This is supposed to be a comprehensive list of exercises from Chaps 2, 3 and 4 of Wackerly that needs to be mastered over the rest of the semester. As of now, the list includes only Chap 2 exercises. I shall keep on updating it as we cover the remaining chapters.

The TA will cover these during the remaining REC sessions and an hour out of the regular class lecture time that I shall free up for this purpose.

Many of these exercises are repetitive. To optimize your time, the TA's time and your benefit from these exercises, during each session, please point out the ones that you can do by yourself given what you have done before.
