8:00-10:30 pm US EST

About United States Heartland China Association (USHCA)

United States Heartland China Association is a 501(c)3 bipartisan nonprofit originally founded in 2003 with a commitment to strengthening the ties between the United States and the People's Republic of China. We build those ties through promoting exchanges in culture, education, and business between our two countries with a special focus on the American Heartland region.

www.usheartlandchina.org

Agriculture is more than just about trade and business. It is the bedrock of a healthy U.S.-China relationship.

It is imperative that we support continued dialogue and collaboration in order to build a healthy U.S.-China relationship around agriculture and beyond.

Bob Holden
Chairman & CEO, US Heartland China Association
Former Governor of Missouri

In looking back four decades, it is clear that the American heartland played a central role in building a strong and mutually beneficial relationship between China and the United States, and particularly with senior-most Chinese leaders.

Now, after several years of turbulence in government-to-government relations, the key to restoring stability in the US - China relationship may once again be found in middle America rather than national capitals. As we enter a new political period, the US Heartland China Association is extremely well positioned to play a significant catalytic role in restoring and rebuilding the U.S. - China bilateral relationship.

Ambassador Kenneth M. Quinn (ret.)
President Emeritus, the World Food Prize
Strategic Advisor & Member of US Heartland China Association
